Jazz-Rock Fusion ~ Retro & Modern Mix

**BECAUSE, Everyone needs a little
~ Jean Therapy!**

jazz rock FUSION - retro/modern mix!

"Jean Therapy made our wedding absolutely swinging! All of our guests raved about the music, and we could not have asked for better entertainment. Miles away from the standard cheesy wedding band, they are a truly talented and unique bunch of musicians. They were a joy to work with and provided the perfect atmosphere for our reception: upbeat, fun, groovy and classy!"

- Sara Elizabeth & Soroush Se

JEAN THERAPY celebrates the sophistication of master musicians like Joni Mitchell (Shadows & Light), Walter Becker & Donald Fagen of the band Steely Dan, Carlos Santana, Burt Bacharach, Stevie Wonder & Sergio Mendez with their own modern interpretations of yesteryear tunes.

Blending a classic mid-century vibe with modern complexity Jean Therapy's retro pop styling & jazz-rock sophistication are the perfect prescription to fill a room with vibrant sound.

There is a tongue-in-cheek nostalgia to this unique cover band's repertoire and their musical chemistry is evident in the interplay and dynamics of the group's performances as a duo, combo, or full six-piece band.

Both RETRO & MODERN ~ It's fun. It's adult. It's unexpected.

"We all have a lifetime of experience and influences that converge in an unusual mix. For us it's all about a multigenerational mash-up of our parents' music, the diverse music of our own generation, and our kids' great modern music. As a band we gravitate to the lesser played covers - aiming slightly off center - towards a target that's not easy to define. It's a musical space with a complex history and haunting appeal - a space to revisit and celebrate. Like someone said - it's that amazing moment when you hear a song you haven't heard in years and you still know every word. And you LOVE it!"

- Jean Lenke

"The music we play is part of our collective DNA. It's a mixture of the popular music grew up on through the 70's and the music that our parents played on the AM radio, ubiquitous, always there as we drove to the shore in the back of our parent's station wagon. Whether you love it or hate it, songs like 'Walk on By' & 'It's Too Late' are imprinted in our brains."

- Dan McKay
